2013-165 Change IAAS Program Name and Major

Existing Catalog Description of Major:

The African American Studies minor is an interdisciplinary study of African people on the continent and Diaspora through the humanities, social sciences and the arts, with particular emphasis on African Americans. Its broad educational objectives are to engender among all students an intellectual appreciation of black life, to encourage students to develop critical and analytical skills, as well as to appreciate ideals of equality, democracy and humane values. The Institute for African American Studies strives to provide the student body, in general, with substantive knowledge of the varied experiences of black people in the United States and abroad and to facilitate understanding and diversity. The Institute, thereby, extends the mission of the University of Connecticut and strategic plan to provide the people of the state and elsewhere with a high standard of education that is relevant to a diverse and dynamic world.

Proposed Catalog Description of Major:

Taking as its central mission the study of the African descended on the continent and in the diaspora, the Africana Studies major seeks both a nuanced and interdisciplinary understanding of human experience. The Africana Studies minor does so through the humanities, arts, and social sciences, with particular emphasis on ciphering continuities and discontinuities across geography and time. Its broad educational objectives are: to engender among all students an intellectual appreciation of black lives and their saliency for all human experience; to deepen students' critical analytic skills; and to value social equality, democracy, and humanitarianism. The Institute for Africana Studies strives to provide students and the university community with substantive knowledge of the black world and its linkages to national as well as pre, sub, supra, and transnational processes. The Institute for Africana Studies also seeks to facilitate respect and positive inter-social relationships within the university community. The Institute therefore meets and exceeds the University of Connecticut's strategic plan by providing students, the university, the state of Connecticut, and external communities with knowledge that is critical to engaging fully the dynamism and interdependencies of our global environment.
