Old Business

Bachelor of Science sub-committee

ECON has proposed a new B. S. degree in economics. The B. S. subcommittee felt that the proposal was adequately rigorous for B. S. but perhaps inadequately broad, as it did not propose to expose ECON B. S. students to introductory sequences in other sciences like physics and chemistry. One model discussed is that of Ohio State, where the introductory ECON sequence is a choice in the core for all B. S. students and ECON students must take one other sequence like physics or chemistry. (The calculus sequence is part of the existing ECON proposal.) The subcommittee felt that it would be preferable for ECON to propose a B. S. degree that did require ECON students to take a physics or chemistry sequence but did not alter the current B. S. core – essentially emulating the Ohio State system as a “one off” B. S. for ECON that does not follow the College's current B. S. requirements. (C&C approved the possibility of such one-off B. S. programs several years ago (HDFR).

Richard Langlois reported that the ECON department is happy with a requirement that its B. S. students take a PHYS or CHEM sequence and moreover is enthusiastic about

Approved May 9th, 2013

making ECON part of the B. S. core. ECON plans to submit a proposal for a one-off B. S. in the fall, but is interested in pursuing a thorough rethinking of the B. S. core, including but not limited to the issue of whether sciences like ECON and PSYC should become formally part of it.
