*Required of all students not meeting the University requirements of three years of a single foreign language in high school.

**It is suggested that students take anatomy & physiology I and II in the summer prior to the sophomore year. Taking the courses in the summer instead of the fall and spring in no way advantages a student in the admissions process, it simply provides students with the option to lighten their credit load during the school year.

Lower division requirements have been selected to assist students with completing the general education requirements, including two W courses (one must be 2000-level or above and associated with the student's major) and two Q courses (one Q course must be from Mathematics or Statistics). Courses in Content Areas 1-3 must be in different departments. Students must earn at least 120 credits with a minimum total grade point average of 2.2.

***BOC certification requires that students (a) receive a Bachelor of Science degree from an accredited athletic training program, and (b) take a national certification examination.
