

## Outline

○ What is ALEKS.
○ Which students need to take ALEKS.
○ FAQ on ALEKS implementation.
○ Instruction change and implementation.

- Data analysis from Fall 2013.

○ Data collection for Spring 2014.

## What is ALEKS?

○ Assessment and LEarning in Knowledge Spaces
○ Artificial intelligence assessment tool.
○ Adaptive questioning to accurately determine strengths and weaknesses of students in mathematical knowledge.

○ Provides options of remediation to get better.
○ Places students based on their prior knowledge.

## Who needs to take ALEKS at UConn?

○ All Engineering majors.
○ All degree programs that confer BS degrees to students.
○ Several majors from CLAS

- Biology
- Chemistry

○ Mathematics etc.
○ List of all majors can be found here
n http://placement.uconn.edu/mathematics-placement

## How does the placement work at UConn?

○ Freshmen students take ALEKS before their orientation.

○ The placement score is used to place them in appropriate Math course.

- $76 \%$ and above place in Math 1131.
- $75 \%$ and $61 \%$ placed in Math 1060.

○ For Math 1131/1151 and Math 1132/Math1152 ALEKS placement score is a required pre-requisite.

○ ALEKS score is recommended for Math 1060

## What about transfer students, AP, ECE credits?

○ Transfer students who have credit for Math 1131 need to have an ALEKS score to be placed in Math 1132.

○ Students with transferred AP credits and ECE credits also need to take ALEKS placement exam and get a qualifying score to be allowed to enroll in Math 1132.

## ALEKS score distribution for Fall 2013

# Key for Instruction is ALKES knowledge slices! 

## Change in instruction for pre-calculus and Calculus

○ Math 1060
○ More rigorous in terms of pre-calculus material
$\bigcirc$ Focus of logs, exponential functions, trigonometry.

- Assessments in term of written quizzes.
- Should be able to get qualifying scores in ALEKS.

○ Math 1131

- More quizzes online and in-class.

○ Worksheets to address specific knowledge gaps.

## Data collection for Spring 2014

○ New data integration portal created.
○ Upload data into a secure site.
○ https://qcmath.uits.uconn.edu
○ Works with the wired connection only.
○ Accessing this website from outside use VPN.

## Thank You!

○ All the TAs for Math 1060, Math 1131 in Fall 2013
○ Steven Pon for Math 1060 data analysis.
○ Jeff Winston from ACES for data integration and merging.

- Jonathan Judge for creating the new website.
