Large Lectures in Calculus: A challenge in Teaching and Research

S.I.G.M.A. Seminar

Amit Savkar and Fabiana Cardetti

Department of Mathematics University of Connecticut

Friday, November 5, 2010

・ロト ・ ア・ ・ ヨト ・ ヨト

Outline

- Large lecture issues
- Three technological tools
- Preliminary Students Perceptions
- Research process

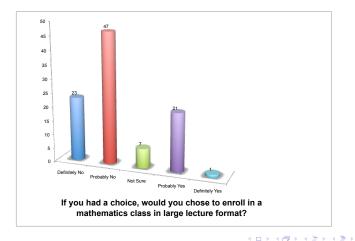

Title

Outline

Large lecture issues

Three technological tools Preliminary Students' Perceptions Research Process

What do student think?

Large lecture issues

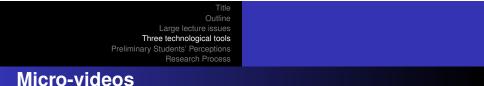

- 150+ students versus 32 students.
- Projector, Document camera, Sympodiums Versus Blackboard/ Whiteboard.
- Invisible versus Visible.
- Uninvolved versus Involved.
- Ohaos versus Order.

• I > • I > •

- Student Teacher interaction.
- Are students on the same page as you? In-class interaction.
- Organize study material.

< ロ > < 同 > < 回 > < 回 >

- Decide on a topic or concept.
- You need a white or black board.
- A handheld camera.
- A well lit room.
- Software to process the video.
- A server to host it. Click here

< 同 > < ∃ >

Interactive Response Systems: "Clickers"

- Prepare questions in advance.
- Be prepared to ask follow up questions.
- Key is in the response.
- Good questions leads to insightful data.
- Iterative process.
- Post them online

Title Outline Large lecture issues Three technological tools Preliminary Students' Perceptions Research Process	
Flash Cards	

• Pick concepts, formulae, identities etc.

Preliminary Students' Perceptions

Research Process

Preliminary Students' Perceptions

Savkar & Cardetti Large Lectures in Calculus

Research Process

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation
- 5. Dissemination

Research Process

- Preliminaries
- 2 Study Design
- Preparations and Implementation
- Oata Analysis and Interpretation
- Oissemination

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation
- 5. Dissemination

Preliminary steps

- Research Problem
- Purpose
- Literature Review
- Research Question

Research Problem

A general problem, issue, or concern Stands on its own

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

5. Dissemination

Preliminary steps

- Research Problem
- Purpose
- Literature Review
- Research Question

Purpose

Major intent of the study to address the problem Narrows research problem down to a specific aspect

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

5. Dissemination

Preliminary steps

- Research Problem
- Purpose
- Literature Review
- Research Question

Literature Review

Justify the research problem and purpose Summarize present state of knowledge Identify deficiencies in the evidence Interface between Purpose and Research Question

1. Preliminaries

- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

5. Dissemination

Preliminary steps

- Research Problem
- Purpose
- Literature Review
- Research Question

Research Question

Specific Question(s) to be addressed in the study

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

5. Dissemination

Design Approaches

Research question determines the design approach

- Quantitative Study
- Qualitative Study
- Mixed Methods Study

Quantitative

Experimental research Correlational research Survey research

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

< ロ > < 同 > < 回 > < 回 >

5. Dissemination

Design Approaches

Research question determines the design approach

- Quantitative Study
- Qualitative Study
- Mixed Methods Study

Qualitative

Grounded Theory research Ethnographic research Narrative research

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

(日)

5. Dissemination

Design Approaches

Research question determines the design approach

- Quantitative Study
- Qualitative Study
- Mixed Methods Study

Mixed Methods

Combination of quantitative and qualitative approaches to best understand and explain the research problem

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation

5. Dissemination

Preparations

- Institutional Review Board (IRB)
- Honoring research sites
- Instruments (surveys, interview guides, observation rubrics)

Research on human subjects

IRB \rightarrow protecting the rights of participants UConn IRB

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation
- 5. Dissemination

Preparations

- Institutional Review Board (IRB)
- Honoring research sites
- Instruments (surveys, interview guides, observation rubrics)

- 1. Preliminaries
- 2. Study Design
- 3. Preparations and Implementation
- 4. Data analysis and interpretation
- 5. Dissemination

Preparations

- Institutional Review Board (IRB)
- Honoring research sites
- Instruments (surveys, interview guides, observation rubrics)

 1. Preliminaries

 Outline
 2. Study Design

 Large lecture issues
 3. Preparations and Implementation

 Three technological tools
 4. Data analysis and interpretation

 Preliminary Students' Perceptions
 5. Dissemination

Preparations specific to our study

IRB protocol submission and approval

- Course Coordinator approval
- Preparation of all instructional materials and surveys
- Formatting, editing, uploading, and testing web-based tools

Title
Outline1. PreliminariesLarge lecture issues
Three technological tools2. Study DesignPreliminary Students' Perceptions
Research Process3. Preparations and Implementation4. Data analysis and interpretation5. Dissemination

Preparations specific to our study

- IRB protocol submission and approval
- Course Coordinator approval
- Preparation of all instructional materials and surveys
- Formatting, editing, uploading, and testing web-based tools
