Executive Summary

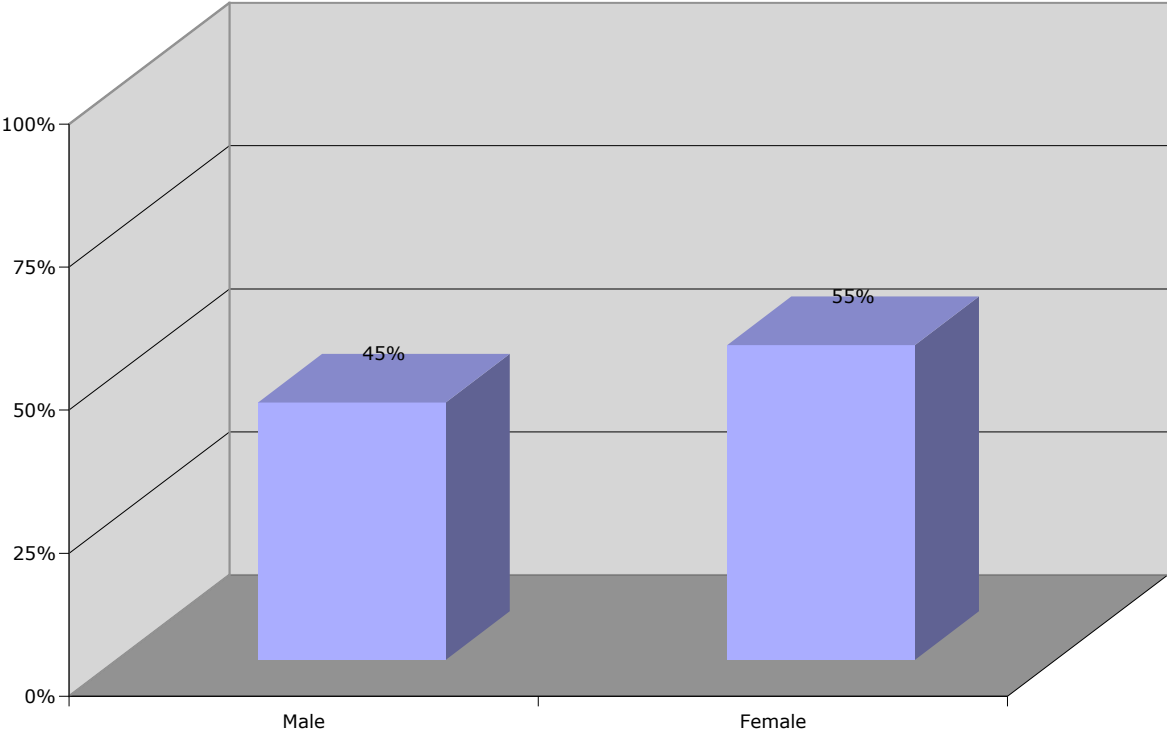

The *Survey of Internet Use and Online Reading* was administered to participating seventh grade students (n=125) at School District 06-C during the 2005-2006 academic year.

The results, presented in the following pages in greater detail, include the following findings:

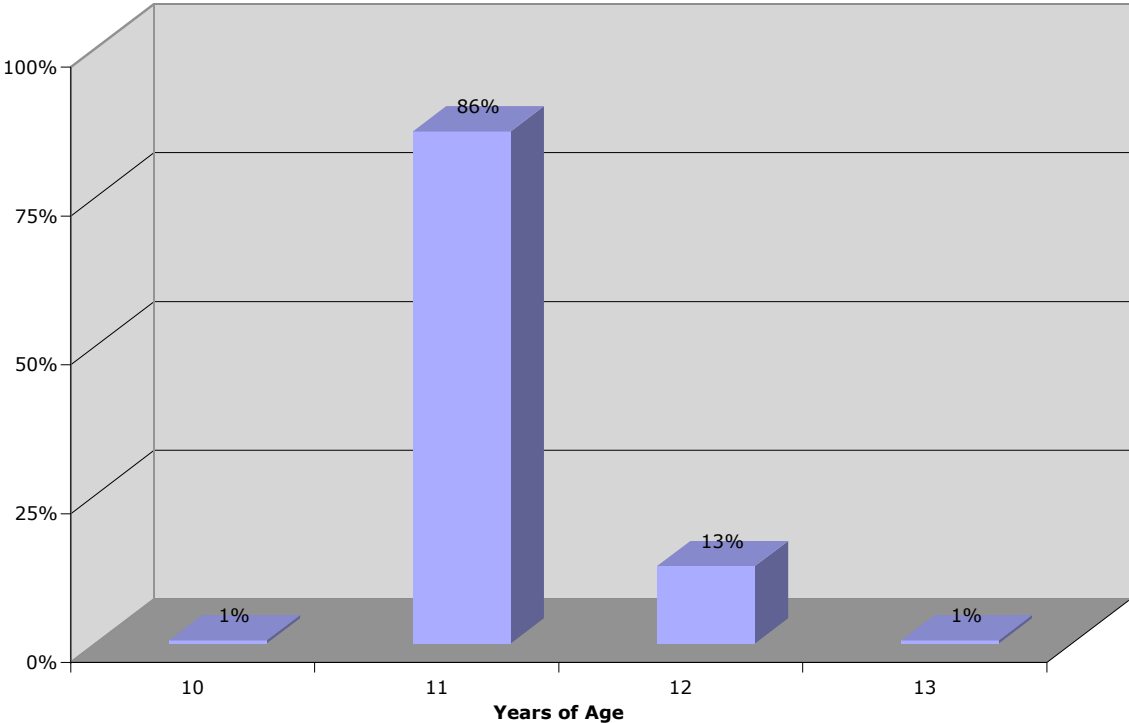

- 78% of students have a computer in their home. Of these students, 84% have Internet access at home.
- 49% say that the amount of time they spend on the Internet has increased during the past year.
- 52% of students report using the Internet the most often at home; 33% report using the Internet the most at school.
- 53% of students are required to use the Internet for a school assignment less than once per week.
- Only 29% of students use the Internet at school a few times per week or more WHILE 62% of students use the Internet outside of school a few times per week or more.
- Only 17% of students use search engines at school a few times per week or more WHILE 31% of students use search engines outside of school a few times per week or more.
- No students reported sending email at school a few times per week or more, WHILE 34% of students send email outside of school a few times per week or more.
- Only 3% of students always check the accuracy of the information they read online at school.
- Only 2% of students always check the accuracy of the information they read online outside of school.
