Competitive Analysis:
The US Wireless Telecommunications Carriers industry is the most competitive in the telecommunications sector. One indication of the level of competition is the churn rate, which refers to the number of customers an industry player loses over a given period of time. Most players experience a high monthly churn rate due to the industry’s high level of competition. Within the industry, competition is based on price, services offered, value-added product innovation and geographic coverage.

Pros:
Verizon is clear leader in the industry with coverage of more than 95% of U.S population.
Continues to add millions of new subscribers each year and it’s customers are the most loyal in the business
Acquiring 100% of Verizon wireless will enable it to better create packages of services for larger business customers across U.S

Risk Factors:
Cost of maintaining network quality is very high, around 13% of revenue
Verizon Wireless will need all the spectrum it holds, if not more, to meet data growth.

Industry Trends:
The Wireless Telecommunications Carriers industry is well positioned for future growth. Over the five years to 2018, the number of wireless subscribers is expected to continue increasing. As a result, revenue is projected to grow at an average annual rate of 6.6% over the next five years, reaching $266.1 billion in 2018.

Investment Thesis:
Buy recommendation is based on the Expanding demand for wireless data services is anticipated to offset declining demand for voice-only services, particularly as more broadband-enabled mobile devices like tablet computers and e-readers achieve wider penetration.
