Proposed Catalog Description of Major:

The American Studies Program at the University of Connecticut provides students with the opportunity to gain a critical understanding of the American experience while allowing individual students to define what aspects of that experience they would like to explore. Although our required courses focus largely on the United States, the field is now understood as comprising the study of issues and subjects from throughout the Western Hemisphere. Among the goals of the American Studies curriculum is to promote an awareness of complex cultural, political, and economic structures at the root of the social organizations that have existed throughout the history of what has come to be known as the “New World.” Other areas of concentration may include, for example, the ways in which literary, musical, and visual artists have articulated cultural concerns, our changing understandings of the geography and ecology of the Western Hemisphere, or issues of cultural and ethnic diversity.

Prerequisite: AMST 1201

Core Courses: 15 Credits (One course from I, II, III, IV, and V below.)
1. One course from the following: HIST 3502, HIST 3504, HIST 3510, 3516, 3561, 3562, 3563, 3564.

3. POLS 2607 or 3602 or 3802 or 3817 or ECON 2102
4. One 2000-level or above course that deals with Latin America, Canada, or the Caribbean.
5. AMST/ENGL 3265W: Seminar in American Studies: 3 Credits (W). This seminar will provide an in-depth study of a historical period, event, or cultural movement from an interdisciplinary perspective. Students will produce a substantial essay on a topic approved by the instructor.

2013-203 Change AMST Minor

Approved.

Proposed Catalog Description of Minor:

American Studies
This minor promotes an interdisciplinary understanding of the complex economic, political, and cultural structures at the root of the societies of the Western Hemisphere. Our studies range from the first immigrations across the land bridge from Siberia, to the colonization of the Americas by Europeans, to the present day. Students may also examine such issues as ethnicity, gender relations, and environmental awareness, and discuss how literary and visual artists have articulated contemporary cultural concerns.

Students must complete fifteen credits, including:

- any one of the following: AMST 1201, AMST 3265W, ENGL 2201, ENGL 2203, ARTH 3440
- one 2000-level or above history course, approved by the American Studies Director.
- They must then choose a track, a series of related, 2000-level and above courses within a broad area of study. Students must complete three courses within this track in order to attain the minor.

A student may not use American Studies courses to fulfill simultaneously the requirements of his or her major field and the requirements of the minor.
To ensure focus, students must provide a brief rationale for their track and course choices.
The minor is offered by the American Studies Program. For more information, contact Wayne Franklin, Director, 486-4263.

Proposed Catalog Description:

**Human Rights**
The field of concentration in Human Rights gives students an understanding of the legal instruments, norms, and institutions that constitute contemporary human rights law, as well as the social movements, cultural practices, and literary and artistic representations that have and continue to imagine the human rights ethic in various ways. In recent years, the human rights dimensions of many of the most vexing and pertinent issues at the global, national, and local level have gained prominence - including the problems of environmental deterioration, economic inequality, and ethnic and religious conflict. Students who major in Human Rights will be better equipped not only to understand the complex nature of these and other issues, but also to develop and pursue novel approaches toward a better world. In addition to studying the manifold histories, theories, and practices of human rights in a systematic and comprehensive manner, students majoring in Human Rights will also develop more specialized methodological and topical expertise in a second discipline.

To complete the Major in Human Rights, students are required to maintain and complete an additional major offered in the College of Liberal Arts and Sciences or an additional degree program offered in another University School or College. For students completing a double major within the College of Liberal Arts and Sciences, a minimum of 48 credits without overlap is required to earn both majors and students will receive one degree appropriate to their primary major.
For students completing a dual degree, at least 30 degree credits more than the degree with the higher minimum-credit requirement must be completed (a minimum of 150 credits) and students will receive a Bachelor of Arts in Human Rights along with another degree appropriate to their second program.

Appendix A

Report of the Subcommittee on General Education Area Requirements
Members: Lindsay Cummings (Dramatic Arts, School of Fine Arts), Harris Fairbanks (English), Katrina Higgins (CLAS), Micki McElya (History), Merrill Singer (Anthropology), Lionel Shapiro (Philosophy, chair), Sebastian Wogenstein (LCL)

The subcommittee discussed the issue raised by courses approved since 2005 by GEOC for Content Area 1 (Arts and Humanities). Until now, there has been no procedure for the C&C Committee to use in considering these courses for inclusion in one or more of CLAS general education areas A through E. The subcommittee makes the following recommendations:

(1) Future proposals to add or change undergraduate courses should specify which, if any, of the five general education areas A through E the course is to be considered for, and provide a brief justification. The C&C Committee will then use this justification, together with the proposal submitted to GEOC, in deciding whether the course fulfills the objectives of the area or areas in question. (Courses offered by departments or programs outside of CLAS will be brought to the attention of the C&C Committee by the Dean’s Office.)

(2) In making this determination, the C&C Committee should consider guiding principles for each of the five areas. The subcommittee has drafted proposed guiding principles for the C&C committee’s review (see below).

(3) The subcommittee should be tasked with reviewing each course that (a) was approved by GEOC since 2005 and (b) currently counts for any of the five areas, to determine whether it fulfills the objectives of that area. The basis for this review will be the proposal submitted to GEOC, together with the guiding principles for each area (as approved by the C&C Committee). The subcommittee will then make its recommendations to the C&C Committee.

(4) Should it be determined that a course does not meet the objectives of an area to which it is currently assigned, the department or program offering the course may, if it wishes, proceed in one of the following ways:
   - propose that the course be assigned to a different area or areas
   - submit a revised course description to GEOC to demonstrate that the course fulfills the objectives for the currently assigned area.

Proposed Guiding Principles:

**A. Courses that satisfy the requirements of Area A (Arts) engage students in the exploration of visual arts, multimedia arts, the dramatic arts, music, and/or analytical and creative forms of writing.** Moreover, these courses engage students in one or more of the following:
   - Investigation of the conventions and aesthetics of a particular art form.
   - Inquiries into aesthetic theory.
   - Analysis of the historical and social significance of one or more art form.
   - Analysis of the role that art plays in the formation, expression, and revision of human culture.
• Comparative analysis of cultures through their modes of artistic expression.
• Investigation of an art form through creative and practical engagement with that form (i.e. making art).

B. Courses that satisfy the requirements of Area B (Literature) 1) explore written texts or their dramatic performances in live theater, film, or video with respect to their aesthetic, philosophical or rhetorical qualities, 2) study historical, critical, and theoretical approaches to such texts, or 3) analyze texts of any description to illuminate the ways in which they produce meaning.

C. Courses that satisfy the requirements of Area C (History) aim to understand and reconstruct the human past with an emphasis on change over time through consideration of pertinent evidence, methods of documentation, interpretation, and explication.

D. Courses that satisfy the requirements of Area D (Philosophical/Ethical Analysis) introduce students to reasoning about fundamental questions of human existence and to critical reflection on the evidence for our most basic convictions. The skills to be cultivated include analyzing and evaluating arguments in defense of various positions. Such analysis is used to explore questions in one or both of the following broad categories: 1) the nature of reality together with the nature and extent of our capacity to represent and know about reality, and 2) which values and principles we ought to embrace in our lives, institutions, and communities.

E. Courses that satisfy the requirements of Area E (World Cultures) have two key components: 1) they examine one or more of the following: ethnic or cultural identity, cultural heritage and custom, the arts and other cultural expressions, cultural history, and cultural patterns and ways of life; and 2) while they may focus on individual ethnic, cultural, or national groups or particular cultural domains (e.g., film, literature, specific domains of social life), they do so in the context of a cross-group comparative and/or an historic/developmental perspective intended to convey global understandings.
