Proposals

2004-191 revised
[Note from the Chair: This proposal was tabled at our 12/14/04 meeting, in order to obtain feedback from those involved in developing the Human Rights program at UConn regarding the general title for such courses. After several e-mail exchanges between myself and Paul Bloomfield, Arnold Dashefsky, Richard Wilson, and Davita Glassberg, we have agreed that "Topics in ..... and Human Rights" would be the most appropriate title for such variable topics courses, including PHIL 2xx.]

Proposal to Add a New Undergraduate Course
1. Date: November 18, 2004
2. Department requesting this course: Philosophy
3. Semester and year in which course will be first offered: Fall 2005
Final catalog Listing (see Note A):
PHIL 2XX. Topics in Philosophy and Human Rights
Either semester. Three credits. Prerequisite: One three-credit course in Philosophy or consent of instructor. With a change in content, may be repeated for credit.
What are human rights? Why are they important? Topics may include the philosophical precursors of human rights, the nature and justification of human rights, or contemporary issues bearing on human rights.

Items included in catalog Listing:
Obligatory Items
1. Standard abbreviation for Department or Program: PHIL
2. Course Number: 2XX
   If using a specific number (e.g. "254" instead of "2XX"), have you checked with the Registrar that this number is available for use? __ Yes __ No
3. Course Title: Topics in Philosophy and Human Rights
4. Semester offered: Either
5. Number of Credits: Three
6. Course description: What are human rights? Why are they important? Topics may include the philosophical precursors of human rights, the nature and justification of human rights, or contemporary issues bearing on human rights.

Optional Items
7. Number of Class Periods: NA
8. Prerequisites, if applicable: One three-credit course in Philosophy or consent of instructor.
9. Recommended Preparation: NA
10. Consent of Instructor: NA
11. Exclusions, if applicable: NA
Justification

1. Reasons for adding this course:
The intention is to get a course on the books that takes a specifically philosophical approach to human rights questions and to provide a place for teaching post-docs and visiting Gladstone professors to teach courses in the area of Human Rights and philosophy. Regular UConn faculty in the Philosophy department [e.g., Gilbert, Meyers, Bloomfield and Lynch] would also be able to teach a one time special topic course on human rights under this proposal if they so desire.

2. Academic Merit:
This course would examine Human Rights issues from a philosophical perspective. A theoretically and empirically grounded undergraduate course that explores selected topics dealing with human rights and epistemology, ethics, and social/political philosophy. The course will consist of lectures, readings, discussions, presentations, and a final term paper.

3. Overlapping Courses: None
4. Number of Students Expected: Variable, depending on available faculty
5. Number and Size of Section: Variable, depending on available faculty
6. Effects on Other Departments: Enhance to number of potential Human Rights courses for the Minor
7. Effects on Regional Campuses: None
8. Staffing: Variable

2004-197 revised
Proposed to C&C 12/14/04 - tabled in order to provide time to modify requirements

Proposal to Add a Minor
1. Date: November 22, 2004, revised Jan. 31, 2005
2. Department requesting this change: India Studies Program, India Studies Advisory Committee, Office of International Affairs
3. Title of Minor: India Studies
3. Does this Minor have the same name as the Department or a Major within this
4. Catalog Description of the Minor: INDIA STUDIES
Completion of a minimum of fifteen credits at the 200 level are required, including at least 2 courses from Group A and at least two courses from Group B. Remaining credits can be completed in INDS courses or an additional course from Group A or B. In addition the India Studies minor requires participation in an approved study abroad program that includes at least three weeks in India with completion of at least one course, or the completion of INDS 296. Also recommended are appropriate 100-level courses that provide an introduction to the advanced courses. These might include Philosophy 106 and Art History 140. Students are strongly encouraged (although not required) to take an Indian language course in the Critical Languages program.

Group A: Core courses
HIST 277 (or AASI 277). Modern India
INDS 210. Ancient and Indian Classical literature in Translation
PHIL 263. Oriental Philosophy and religion
POLS 279/279W. South Asia in World Politics
SOCI 222 (or AASI 222). Asian Indian Women: Activism and Social Change in India and the United States
ENGL 218. Literature and Culture in the Third World (when the subtitle is "Literature of India")

Group B: Related courses
SOCI 258/258W. The Developing World
POLS 203/203W. Women in Political Development
ECON 247/247W. Economic Development
ARE 255. Role of Agriculture in Development
ENGL 227/227W. World Literature in English
AH 216 (or AASI 216). Asian Medical Systems
INDS 295. Variable Topics

5. Effective Date: September 2005

Justification
1. Identify the core concepts and questions considered integral to the discipline:
The India Studies minor provides a broad introduction to a major world civilization through a set of coordinated courses in selected areas of Indian society and culture, including history, philosophy, religion, literature, politics, and economic development. Both traditional and contemporary aspects are covered. As indicated in the overview to India Studies proposals, India is intrinsically important as an ancient culture with an enormous body of literature and as a home of great religious and philosophical thought. It is also an emerging economy, a country with one-sixth of the world’s population, and the world’s largest democracy. The study of India will complement and enhance the Asian American Studies minor by providing knowledge about an
important source country for Asian American immigration. It will also provide a coherent area focus for the new structured individualized major in International Relations. This minor also contributes more generally to the internationalization of the curriculum.

2. Explain how the courses required for the Minor cover the core concepts identified in the previous question:
Group A core courses provide a broad knowledge of Indian history, culture and politics. Group B courses provide for more specialized instruction or knowledge of India in a broader, comparative context. The thesis provides the opportunity for yet more specialized instruction or and intensive exploration of a particular topic. Study abroad provides experiential knowledge of contemporary India.

4. Attach a "Minor Plan of Study" form to this proposal. See Appendix 2004-197 revised

Proposal to Change an existing Minor

1. Date: December 10, 2004
2. Department requesting this change: Psychology
3. Title of Minor: Minor in Psychology
4. Nature of Change: Add PSYC 259 (Drugs and Behavior) as an option to Group 3.
5. Existing catalog Description of the Minor:

Psychology
The requirements for this minor are at least 16 credits of 200 level Psychology courses that include

1. PSYC 202Q (4 credits)
2. one course (3 credits) representing the Social and Applied Science Perspectives: PSYC 236, PSYC 240, PSYC 243, PSYC 245, PSYC 268, or PSYC 281
3. one course (3 credits) representing the Natural Science Perspective (PSYC 220, PSYC 221, PSYC 253, PSYC 254, PSYC 256 or PSYC 257, and
4. an additional two elective courses (6 credits) of any 200-level Psychology courses not used to meet the above requirements, with the exception that no more than three credits of either PSYC 297 or 299 may be counted toward the minor. PSYC 294 cannot be used. Other than PSYC 202Q, the courses comprising the minor should be selected in consultation with the student's major advisor to comprise a coherent program relevant to the student's academic and/or career interests and objectives.

The minor is offered by the Psychology Department.

6. Proposed catalog Description of the Minor: (change indicated in **bold red**)

**Psychology**

The requirements for this minor are at least 16 credits of 200 level Psychology courses that include

1. PSYC 202Q (4 credits)
2. one course (3 credits) representing the Social and Applied Science Perspectives: PSYC 236, PSYC 240, PSYC 243, PSYC 245, PSYC 268, or PSYC 281
3. one course (3 credits) representing the Natural Science Perspective (PSYC 220, PSYC 221, PSYC 253, PSYC 254, PSYC 256, PSYC 257, or **PSYC 259** and
4. an additional two elective courses (6 credits) of any 200-level Psychology courses not used to meet the above requirements, with the exception that no more than three credits of either PSYC 297 or 299 may be counted toward the minor. PSYC 294 cannot be used. Other than PSYC 202Q, the courses comprising the minor should be selected in consultation with the student's major advisor to comprise a coherent program relevant to the student's academic and/or career interests and objectives.

The minor is offered by the Psychology Department.

7. Effective Date (semester, year -- see Note R):

**Justification**
1. Why is a change required?
Since the creation of the Minor in Psychology, PSYC 259 (Drugs and Behavior) was added to our curriculum. It is a course that falls within our “natural-science” offerings and that, in terms of its in-depth and integrative content, fits with the other Group 3 (Natural Science Perspective) courses.

2. What is the impact on students?
Because this is a high-enrollment course (180 seats per year), and with minimal prerequisites (either PSYCH 132 or BIOL 107; and, open to sophomores), PSYC 259 will provide an excellent opportunity for students wishing to pursue a Minor in Psychology to fulfill the Group 3 requirement.

3. What is the impact on regional campuses?
This course is not taught at regional campuses.

4. Attach a revised "Minor Plan of Study" form to this proposal (see Note P). See Appendix 2005-1.

Proposal to Add a Group of New Undergraduate Courses

1. Date: Nov. 10, 2004
2. Department requesting this course: Maritime Studies (MAST)
3. Semester and year in which course will be first offered: Fall 2005

Final Catalog Listing

MAST 195. Special Topics Lecture
Either semester. Credits, prerequisites, and hours as determined by the Senate Curricula and Courses Committee. May be repeated for credit with a change in topic.

MAST 295. Variable Topics
Either semester. Three credits. With a change in topic, may be repeated for credit.
Prerequisites and recommended preparation vary. Open to sophomores or higher.

MAST 298. Special Topics
Either semester. Credits and hours by arrangement. With a change in content, may be repeated for credit. Prerequisites and recommended preparation vary. Open to sophomores or higher.

MAST 299. Independent Study
Either or both semesters. Credits and hours by arrangement. May be repeated for credit with a change in subject matter. Open only with consent of instructor.

Items included in catalog Listing:

Obligatory Items
1. Standard abbreviation for Department or Program: MAST
2. Course Numbers: 195, 295, 298, 299
3. Course Titles: Special Topics, Independent Study
4. Semester offered: Either or both semesters
5. Number of Credits:
   ♣ 195 Special Topics Lecture, credits determined by the Senate Curricula and Courses Committee;
   ♣ 295 Variable Topics, three credits;
   ♣ 297 Special Topics, credits and hours by arrangement;
   ♣ 299 Independent Study credits and hours by arrangement.
6. Course description: see above

Optional Items
7. Number of Class Periods, if not standard: Not applicable
8. Prerequisites, if applicable: Not applicable
9. Recommended Preparation, if applicable: Not applicable
10. Consent of Instructor, if applicable: Not applicable
11. Exclusions, if applicable: Not applicable
12. Repetition for credit, if applicable: Not applicable
13. Instructor(s) names if they will appear in catalog copy: Staff
14. Open to Sophomores: 295 Variable Topics, 298 Special Topics
15. Skill Codes "W", "Q", or "C": Not applicable
16. S/U grading: not applicable

Justification
1. Reasons for adding these courses: The Maritime Studies program has been operating for one year and now needs the above courses for its curriculum and to
provide for student needs.

2. Academic Merit: These courses are variable topic, special topic, or independent study. The variable topic, special topic, and independent study courses are important for the new Maritime Studies program to develop and offer its curriculum, just as they are for any other department. The reason we think that the special and variable topics courses should be open to sophomores relates to MAST's location on a regional campus. We are likely to get non-majors wanting to take such classes, and many of these would be sophomores.

3. Overlapping Courses: None

4. Number of Students Expected: varies

5. Number and Size of Section: varies

6. Effects on Other Departments: None

7. Effects on Regional Campuses: It is expected that these courses will be taught at the Avery Point Campus.

8. Staffing: Staffing for the course will be provided by the Maritime Studies Program. No new staff is necessary to offer this course.

9. Dates approved by:
   Department Faculty: Dec. 9, 2004

Proposal to Add a New Undergraduate Course

1. Date: October 1, 2004
2. Department requesting this course: Psychology
3. Semester and year in which course will be first offered: Spring 2006

Final catalog Listing:

PSYC 2xx. Multiculturalism from a Social Psychological Perspective
Either semester. Three credits. Prerequisite: PSYC 133 or 135. Recommended Preparation: PSYC 240. Open to sophomores or higher. *Agocha.*

Introduction to theoretical perspectives and behavioral research that seek to explain the nature and mechanisms of intergroup relations and the psychology of culture, prejudice, and biased behavior.

**Justification**

Reasons for adding this course: Current events and trends in the United States and global demography strongly suggest and perhaps dictate the need for cultural fluency and proficiency. Although the psychology department and university currently provide diversity focused courses, none specifically address the social psychological mechanisms of bias, oppression, and discrimination. Many of these courses are 100 level courses (e.g. SOCI 125 or ANTH 100) and do not provide the depth of exploration and examination of theory and empirical evidence that will be provided in the proposed course. In addition, several of the 200 level courses offered are small W courses with limited enrollment or focus on a specific ethnic group such as African Americans, Asian Americans, or Latino Americans (e.g. PSYC 270W, LAMS 270, AASI 201, AASI 221). This course will explore the psychosocial origins, operation, and consequences of bias for and against various racial/ethnic groups as reported in the psychological literature as well as popular media.

Academic Merit: This course is designed to help students learn to appreciate, understand, and form explanations for multiculturalism and the need for cultural fluency and proficiency. The course will incorporate theoretical perspectives and behavioral research evidence that seek to explain the nature and mechanisms of intergroup relations and the psychology of culture, prejudice, and biased behavior. In addition to fulfilling the Multiculturalism and Diversity General Education requirement, this course would also fulfill the African American Studies major and minor requirements.

Overlapping Courses: This course has been taught as PSYC 241W (Special topics in social psychology: Psychological mechanisms of bias). If approved, this course would no longer be taught as a special topics course. Topics covered in the course may overlap to some degree with the following courses: PSYC 270W (Black Psychology) and SOCI 236 (White Racism), and SOCI 240 (Ethnicity and Race). However, the proposed course differs from these courses by emphasizing social psychological theories, models, and research that explain and account for group based differences, oppression, and biased behaviors. There are courses in psychology that may include some of the topics covered in the proposed course such as PSYC 135 (General Psychology II) and PSYC 240 (Social Psychology); however, the emphasis on race, ethnicity, and culture is emphasized as strongly in these courses as the proposed course.
Number of Students Expected: 50-100
Number and Size of Section: 1-2 sections each year with an enrollment of 50 students in each section.
Effects on Other Departments: This course is not anticipated to affect other departments.
Effects on Regional Campuses: This course is not anticipated to affect the regional campuses.
Staffing: Agocha.

Proposal to Add a New Undergraduate Course

1. Date: October 1, 2004
2. Department requesting this course: Psychology
3. Semester and year in which course will be first offered: Fall 2005

Final catalog Listing:

PSYC 2xy. Introduction to Multicultural Psychology
Either semester. Three credits. Prerequisite: PSYC 133 or 135. Open to Sophomores or higher. Williams.

General introduction to cross-cultural and multicultural issues and the role psychology has played in understanding the experiences of diverse groups.

Justification
1. Reasons for adding this course:
   This course is designed to increase students' knowledge, awareness, comfort, and sensitivity to multicultural issues and to link these experiences to the science of psychology. The course will move from a basic understanding of terms, concepts, and definitions (e.g. race, ethnicity, culture, discrimination, prejudice, hatred, attitudes and behavior, etc.) to more complex conceptualizations of race and culture (racial identity,
inter-ethnic and intra-ethnic dynamics, racism, social and historical systems, etc). This course is designed to provide a framework to engage in multicultural dialogues and to increase each student's awareness of his/her own cultural identity as well as increase awareness of and sensitivity to the experiences of those who are culturally and racially different.

2. Academic Merit:
This course is designed to expose students to a variety of models and theories that explain and demonstrate the diversity of human experiences, provide a context for discussing and understanding systemic and social forces that impact behavior, and provide guidelines and feedback on how to critically evaluate and articulate cultural knowledge, research, and experiences.

3. Overlapping Courses:
The proposed course may overlap to some degree with the following courses: PSYC 270W (Black Psychology), PSYC 241W (Special Topics: Psychological Mechanisms of Bias), SOCI 236 (White Racism), SOCI 240 (Ethnicity and Race), HDFS (Diversity Issues in HDFS); however, the proposed course differs from these courses in two substantive ways. First, the course is an introductory course where basic concepts are introduced to increase cultural competence, awareness, and sensitivity. Second, the course will focus on individual as well as group level processes that place emphasis on self exploration as well as group based evaluations. The course will also reflect theories across disciplines within psychology (e.g. developmental, social, and clinical) as well as other disciplines (e.g. sociology, history, anthropology, and women's studies).

4. Number of Students Expected: 50
5. Number and Size of Section: 1 section of 50 students each academic year.
6. Effects on Other Departments: None.
7. Effects on Regional Campuses: None
8. Staffing: Williams

Proposal to Add Cognitive Science 2XX:
Foundations of Cognitive Science
1. Date: January 18, 2004
2. Department requesting this course: Cognitive Science (COGS)
3. Semester and year in which course will be first offered: Spring 2006

I. CATALOG LISTING

**COGS 2XX: Foundations of Cognitive Science**
Either semester. Three credits. Prerequisite: PSYC 132 or PHIL 101 or LING 101. Open to sophomores or higher.
Origins of and current developments within scientific study of the mind-brain. Topics include: computational theories of mind, artificial and natural intelligence, cognitive neuroscience and the mind/body problem, embodied and distributed cognition, neural networks, self-organizing cognitive systems, learning and innateness.

II. JUSTIFICATION

1. Reasons for adding this course
   *Why is a new course needed? Why can't this subject matter be accommodated in an existing course?*

   Cognitive science is an interdisciplinary field and hence an interdisciplinary major. While the requirements for the major ensure that students are exposed to the theories, methods, and phenomena associated with the field's contributing disciplines (e.g., anthropology, communication sciences, computer science, linguistics, philosophy, psychology, and neuroscience) no currently offered courses have the purpose of identifying the issues of fundamental concern to cognitive science and examining how developments in the various contributing disciplines jointly inform our understanding of these issues. Moreover, because each of these courses is grounded in a specific traditional discipline, none of these courses are appropriate for the goals of the proposed course.

2. Academic Merit
   *"Academic merit" should expand on the brief course description used in catalog copy to spell out more fully how this course will be structured and how it will satisfy the needs of the department or program.*

   Cognitive science is an interdisciplinary field bringing together scientists and scholars who share the assumption that the operation of the mind is open to empirical investigation. The fundamental question, around which much if not most work in cognitive science revolves, concerns the possibility of cognitive engineering: *how are
systems that think, perceive, uses language, and do the myriad other things that we consider intelligent behavior constructed? This course will examine the history of attempts to answer the question, together with ongoing developments at the intersection of the various contributing disciplines.

While the course is organized more-or-less historically, several issues run through the course and unite the various topics, approaches, and movements that constitute the history of cognitive science. These questions recur throughout the entire course, as issues that we see pervading cognitive science past and present. They include:

• **Dualism vs. Materialism.** Modern science rejects Cartesian (substance) dualism, but it doesn't seem to have cast it off completely. Various dualisms survive and raise similar questions: e.g., software vs. hardware (or wetware), algorithm vs. implementation.

• **Modularity.** The modularist holds that it is fruitless to seek a single unified theory of mental behaviors because the mind is really an aggregation of special-purpose devices that are tailored to the exigencies of particular domains (e.g., language, imagery, music, eating). By contrast, the generalist claims that the modular accounts are superficial, because it possible to discover common principles underlying the modules, and thus establish a unified mental theory. If the generalists are right but the modules make good predictions, then a challenging question is raised about the ontological status of the modules.

• **Learning/Innateness.** How much of the structure in the human mind comes from the environment via learning, and how much is imposed by innate structure of the mind itself. The learning hypothesis has been turbo-charged by the arrival on the scene, in the late 20\textsuperscript{th}-century, of connectionist models, which show that very generic learning algorithms can structure aggregations of neuron-like elements to function effectively in a wide variety of domains. Nevertheless, current connectionist models fail to achieve appropriate abstraction/complexity in a number of cases at the core of cognitive science so various tailorings of the assumptions are proposed. Do these vindicate innateness?

• **Complexity.** The discovery of the algorithmic process during the early 20\textsuperscript{th} century led to the realization that behaving systems can be characterized in terms of the type of information processing they do, and that certain complex types of information processing allow a system to organize its behavior in particularly effective ways. Attempting to view the human mind in this light has led to the realization that there are some natural reasons for existence of the some of the seemingly arcane structures of the mind.

• **Memory.** A central insight of cognitive science is that the information structure of a system depends on the type of memory it has. This is tied to the central role of sequence and time in complex mental processing. Fruitful insights have thus been gleaned by asking what sorts of memory processes the mind/brain uses.
For a suggested course outline, see Appendix 2005-05.

3. Overlapping Courses (see Note M):

The content of the proposed course overlaps moderately with several of the “core” courses for the major, including ANTH 244, CSE 282, LING 202, PHIL 250, and PSYC 256. The Cognitive Science Steering Committee (which played an active role in the development of the proposed course) includes members who regularly teach ANTH 244, LING 202, PHIL 250, and PSYC 256. We are confident that the content of the proposed course is not overly redundant with any of these courses. With regard to CSE 282 (Artificial Intelligence), Robert McCartney, Director of Undergraduate Studies for CSE, has been consulted and agrees that the limited amount of overlap is appropriate.

4. Number of Students Expected:

We expect that, at minimum, 15-20 students the first time the course is offered, and that the enrollment will grow as the course becomes better known.

5. Number and Size of Section:
One section. Enrollment will be capped at 40.

6. Effects on Other Departments (see Note N):

The primary effect on other departments concerns staffing. Given the interdisciplinary nature of the course, we believe it should be team-taught by two faculty members with complementary expertise. Present and future faculty members from various departments have the appropriate expertise; we expect the course to initially be taught by a psychologist and a philosopher (See #8 below). The Psychology and Philosophy departments have been consulted, and both have agreed that the instructors for this course would receive credit for teaching a full course. CLAS has agreed to provide these departments with adjunct money so that the courses normally taught by the instructors could still be offered the first time the proposed course is taught.

7. Effects on Regional Campuses:

None.

8. Staffing (see Note P):

Whitney Tabor (Psychology) and Daniel Ryder (Philosophy). (See #6 above.)
9. Dates approved by (see Note Q):

Justification of the Human Rights Minor And New Cross Listing Designation

Rationale
In 1999, Gary Gladstein endowed a Gladstein Visiting Professorship in Human Rights and in 2002 he provided an endowment for a permanent Gladstein Chair in Human Rights. The Gladstein Committee was formed to pursue the intent and focus of this endowment. It recommended the development of a Human Rights Major program, a goal toward which we continue to build with three new faculty hires in the next few years. We have already developed and continue to build a Human Rights Minor Program, which will become a base for the development of the Human Rights Major.

The contemporary concept of human rights has many antecedents, but in the aftermath of the holocaust, human rights were codified in international documents and gained worldwide prominence both as political issues and in scholarly debates. An understanding of human right is, then, central to an informed and critical understanding of social policy within diverse nation states and also of international institutions and practices. Given the University’s strong commitment to standing in the forefront of human rights as a significant academic focus, the Human Rights Minor is a logical program of study.

The Study of Human Rights
What are human rights? How has the concept of human rights evolved? How and
why have human rights been violated, both in the United States and abroad? How have people struggled against human rights violations and with what success? What protections against violations of human rights exist, and how can these protections be enhanced and made more effective? These are the kinds of questions that students choosing to minor in Human Rights are encouraged to pursue. In this minor, students receive interdisciplinary instruction in theoretical, comparative, and historical perspectives on human rights through classroom courses, and gain valuable practical experience in the human rights field through a supervised internship.

Requirements for the Human Rights Minor
The Human Rights Minor is an interdepartmental, interdisciplinary plan of study requiring fifteen credits of course work at the 200-level.

Rationale for Cross Listing
Cross-listing the departmental academic courses offered as part of the Human Rights Minor contributes to the program by giving the courses a Human Rights number in addition to the number and identity these courses currently have in their individual academic departments. This follows the pattern already established by other interdisciplinary programs such as Women’s Studies and American Studies. The courses will not change, nor will the cross-listing number alter the enrollment credited to the faculty members in their academic department. The Human Rights cross-listed number will simply enable students to identify more clearly the courses on the Human Rights Minor, and it will help ensure a minimum number of seats for students enrolled in the Minor.

Justification
1. Reasons for adding this course if it is a new course: N/A
2. Reasons for cross listing this course: Cross-listing the departmental academic
courses offered as part of the Human Rights Minor contributes to the program by
giving the courses a Human Rights number in addition to the number and identity
these courses currently have in their individual academic departments. This follows
the pattern already established by other inter-disciplinary programs such as Women’s
Studies and American Studies. The courses will not change, nor will the cross-listing
number alter the enrollment credited to the faculty members in their academic
department. The Human Rights cross-listed number will simply enable students to
identify more clearly the courses on the Human Rights Minor, and it will help ensure
a minimum number of seats for students enrolled in the Minor.

5. Effective Date (semester, year -- see Note R): fall 2005

Justification
1. Reasons for adding this course if it is a new course: N/A
2. Reasons for cross listing this course: Cross-listing the departmental academic courses offered as part of the Human Rights Minor contributes to the program by giving the courses a Human Rights number in addition to the number and identity these courses currently have in their individual academic departments. This follows the pattern already established by other inter-disciplinary programs such as Women’s Studies and American Studies. The courses will not change, nor will the cross-listing number alter the enrollment credited to the faculty members in their academic department. The Human Rights cross-listed number will simply enable students to identify more clearly the courses on the Human Rights Minor, and it will help ensure a minimum number of seats for students enrolled in the Minor.

**2005-18**

**Proposal to Add a New Undergraduate Course**

1. Date: January 25th, 2005
2. Department requesting this course: Department of Public Policy
3. Semester and year in which course will be first offered: Fall, 2005

**Final catalog Listing**

**PP 101. Introduction to Public Policy**
Either semester. Three credits. Open to sophomores or higher.
Public policy history and institutions, government administration and systems, policy analysis, contemporary policy issues, polling and influences on policy making.

**Items included in catalog Listing:**
**Obligatory Items**
1. Standard abbreviation for Department or Program: PP
2. Course Number: 101 (This is a new department and this course number has not previously been used.)
3. Course Title: Introduction to Public Policy.
5. Number of Credits: Three
6. Course description:
   Public policy history and institutions, government administration and systems, policy analysis, contemporary policy issues, polling and influences on policy making.

Optional Items
7. Number of Class Periods, if not standard: Not Applicable
8. Prerequisites, if applicable: Not Applicable
9. Recommended Preparation, if applicable: Not Applicable
10. Consent of Instructor, if applicable: Not Applicable
11. Exclusions, if applicable: Not Applicable
12. Repetition for credit, if applicable: Not Applicable
13. Instructor(s) names if they will appear in catalog copy: Staff
14. Open to Sophomores: Yes
15. Skill Codes "W", "Q", or "C": Not Applicable
16. S/U grading: Not Applicable

Justification
1. Reasons for adding this course:
The reason for adding this course is to offer an undergraduate offering that introduces students to public policy and administration topics and issues. It also exists to provide a broad survey of policy and administration and alerts students to the approaches to public policy inquiry and contemporary issues in public policy.

2. Academic Merit:
This course will combine readings, lectures, assignments, and evaluation experiences to expose students to the systems of public policy analysis and government policy development and implementation. See Appendix 2005-18 for a proposed syllabus.

3. Overlapping Courses:
None.

4. Number of Students Expected: 15 - 20
5. Number and Size of Section: One section. 20 students.
6. Effects on Other Departments: None.
7. Effects on Regional Campuses: None.
8. Staffing: Staffing for the course will be provided by the Department of Public
Policy. No new staff is necessary to offer this course.

Proposal to Add a New Undergraduate Course

1. Date: January 26, 2005
2. Department requesting this course: Department of Public Policy
3. Semester and year in which course will be first offered: Fall, 2005

Final catalog Listing:

PP 220. Public Policy Research Methods I
Either semester. Three credits.
Research design for policy analysis, impact analysis, implementation analysis, program evaluation.

Items included in catalog Listing:

Obligatory Items
1. Standard abbreviation for Department or Program: PP
2. Course Number: 220
   (This is a new department and this course number has not previously been used.)
3. Course Title: Public Policy Research Methods I.
5. Number of Credits: Three
6. Course description: Research design for policy analysis, impact analysis, implementation analysis, program evaluation.

Optional Items
7. Number of Class Periods, if not standard: N/A
8. Prerequisites, if applicable: N/A
9. Recommended Preparation, if applicable: N/A
10. Consent of Instructor, if applicable: N/A
11. Exclusions, if applicable: N/A
12. Repetition for credit, if applicable: N/A
13. Instructor(s) names if they will appear in catalog copy: N/A
14. Open to Sophomores: N/A
15. Skill Codes "W", "Q", or "C": N/A
16. S/U grading: N/A

Justification

1. Reasons for adding this course:
To prepare students with the concepts and skills necessary to read, understand, design, evaluate and conduct public policy and public management research. No existing courses prepare students with these research skills specifically applied to public policy and public management problems. This course provides additional methods training opportunities to students in a variety of social science disciplines, including Urban and Community Studies.

2. Academic Merit:
This course will combine lectures, examples, exercises and assignments to expose students to the fundamentals of research design when thinking about public sector problems. Students will learn what makes a good theory, how to use program and policy theory to develop research questions and testable hypotheses, how to operationalize and measure theoretical concepts, and how to create designs to test hypotheses about policy impacts.
Students will be introduced to the skills of research design in the particular context of examining public policy and public administration choices, with heavy emphasis on program evaluation. Students will be exposed to unique issues of doing applied policy research, including questions of research ethics.

3. Overlapping Courses:
No courses presently overlap with PP 220. Most Social Science departments offer some form of research methods training for undergraduate students. None offer courses specifically addressing research design issues in public policy and public management.

4. Number of Students Expected: 20

5. Number and Size of Section: One section. 20 students.

6. Effects on Other Departments: None.

7. Effects on Regional Campuses: This course will be taught regularly at Tri-Campus, and will help support the Urban and Community Studies major.
8. Staffing: Staffing for this course will be provided by the Department of Public Policy.

9. Dates approved by:
   Department Curriculum Committee: December 6, 2004
   Department Faculty: December 6, 2004

10. Name, Phone Number, and e-mail address of principal contact person: Mark Robbins, Associate Professor, Department of Public Policy. 860-570-9019.

3. Semester and year in which course will be first offered: Fall, 2005

Final catalog Listing:

PP 221Q. Public Policy Research Methods II
Either semester. Three credits. Prerequisite: PP220 and STAT100Q or STAT110Q, or consent of instructor.
Data analysis for program evaluation, public policy and management research including data description, probability theory, statistical inference, multiple regression and time series analysis.

Items included in catalog Listing:

Obligatory Items
1. Standard abbreviation for Department or Program: PP
2. Course Number: 221
   This is a new department. This course number has not previously been used.
3. Course Title: Public Policy Research Methods II.
5. Number of Credits: Three
6. Course description (second paragraph of catalog entry -- see Note K):
Advanced data analysis and quantitative tools for policy analysis, program evaluation and management research including multiple regression, time series analysis, linear programming and other analytic methods.

Optional Items
Justification

1. Reasons for adding this course: (see Note L)
Prepare students to be critical consumers and effective producers of statistical evidence presented in support of policy arguments. No existing courses prepare students with these data analysis specifically applied to public policy and public management problems. This course provides additional methods training opportunities to students in a variety of social science disciplines, including Urban and Community Studies.

2. Academic Merit (see Note L):
This course will combine lectures, examples, exercises and assignments to expose students to the fundamentals of probability theory, statistical inference, multiple regression, and times series analysis. Emphasis will be on applying these tools in the evaluation and planning of public policies, programs and organizations.

3. Overlapping Courses (see Note M):
No courses presently overlap with PP221Q. Several Social Science departments offer course on data analysis, but no course emphasizes data analysis applied to public policy and public management.

4. Number of Students Expected: 15 – 20

5. Number and Size of Section: One section. 20 students.

6. Effects on Other Departments: None.

7. Effects on Regional Campuses: This course will be taught regularly at Tricampus, and will help support the Urban and Community Studies major.
8. Staffing: Responsibility for teaching this class will rotate among Department of Public Policy tenure track faculty.

9. Dates approved by:
   Department Curriculum Committee: December 6, 2004
   Department Faculty: December 6, 2004

10. Name, Phone Number, and e-mail address of principal contact person: Mark Robbins, Associate Professor, Department of Public Policy. 860-570-9019.

Final catalog Listing

PP 222. Practicum in Public Policy
Either semester. Three credits. Open to sophomores.
Policy workshop on the practical application of making public policy.

Items included in catalog Listing:
Obligatory Items
1. Standard abbreviation for Department or Program: PP
2. Course Number: 222 (This is a new department and this course number has not previously been used.)
3. Course Title: Practicum in Public Policy.
5. Number of Credits: Three
6. Course description:
   Policy workshop on the practical application of making public policy and the development of oral communication skills. The course focuses on state level policy-making.

Optional Items
7. Number of Class Periods, if not standard: Not Applicable
8. Prerequisites, if applicable: Not Applicable
9. Recommended Preparation, if applicable: Not Applicable
10. Consent of Instructor, if applicable: Not Applicable
11. Exclusions, if applicable: Not Applicable
12. Repetition for credit, if applicable: Not Applicable
13. Instructor(s) names if they will appear in catalog copy: Staff
14. Open to Sophomores: Not Applicable
15. Skill Codes "W", "Q", or "C": Not Applicable
16. S/U grading: Not Applicable

**Justification**

1. Reasons for adding this course:
The reason for adding this course is to offer undergraduate course content that introduces the student to the practical aspects of state level public policy-making. The Department of Public Policy’s location at the Greater Hartford Campus is only minutes from the State Capitol. The course will focus on contemporary policy dilemmas and debate as they are played out by legislative and executive policy-makers in the State Capitol.

2. Academic Merit:
This course will combine lectures, examples, exercises, assignments, and on-site meetings with State policy-makers. Students will have direct exposure to state policy-makers as they grapple with current public policy issues at the State Capitol. Students will learn the nuance of policy-making that can best be obtained from the policy-makers themselves.

For sample syllabus, see **Appendix 2005-21**.

3. Overlapping Courses: No courses presently overlap with PP 222.

4. Number of Students Expected: 15 - 20
5. Number and Size of Section: One section. 20 students.

15. Skill Codes "W", "Q", or "C": W. This course is designed to satisfy the GEOC requirement for writing.
16. S/U grading: Not applicable

**Justification**

1. Reasons for adding this course:
The reason for adding this course is to offer undergraduate students the opportunity to learn policy analytic frameworks and apply them to contemporary public problems and to develop their ability to communicate and write clearly and analytically.

2. Academic Merit:
This course combines lectures on theories and tools of policy analysis with case discussion and writing assignments to develop student’s ability to think analytically, and to communicate and write clearly about complex subjects. For sample syllabus, see Appendix 2005-23.

3. Overlapping Courses: None
4. Number of Students Expected: about 15

First semester. Three credits. Prerequisite: PHYS 123 or 132 or 142, or 152, which may be taken concurrently; MATH 113 or 115 or 120, which may be taken concurrently, not open to students who have passed GEOL 264Q. 
Cormier
The composition, structure, and dynamics of the Earth's core, mantle, and crust inferred from observations of seismology, geomagnetism, and heat flow.

b) **GEOL 276Q. Fundamentals of Planetary Science**
Second semester. Three credits. Prerequisite: PHYS 123 or 132 or 142, or 152, which may be taken concurrently; MATH 114 or 116 or 121, which may be taken concurrently, not open to students who have passed GEOL 266Q. 
Cormier
Evolution of the solar system, celestial mechanics, tidal friction, internal composition of planets, black-body radiation, planetary atmospheres.

4. Proposed Catalog Copy/Copies:

a) **GEOL 274Q. Physics of the Earth's Interior**
(Also offered as PHYS 2xyQ.) First semester. Three credits. Prerequisite: PHYS 123 or 132 or 142, or 152, which may be taken concurrently; MATH 113 or 115 or 120, which may be taken concurrently, not open to students who have passed GEOL 264Q. 
Cormier
The composition, structure, and dynamics of the Earth's core, mantle, and crust inferred from observations of seismology, geomagnetism, and heat flow.

**PHYS 2XYQ. Physics of the Earth's Interior**
(Also offered as GEOL 274Q.) First semester. Three credits. Prerequisite: PHYS 123 or 132 or 142, or 152, which may be taken concurrently; MATH 113 or 115 or 120, which may be taken concurrently, not open to students who have passed GEOL 264Q. 
Cormier
The composition, structure, and dynamics of the Earth's core, mantle, and crust inferred from observations of seismology, geomagnetism, and heat flow.

b) **GEOL 276Q. Fundamentals of Planetary Science**
(Also offered as PHYS 2xzQ.) Second semester. Three credits. Prerequisite: PHYS
123 or 132 or 142, or 152, which may be taken concurrently; MATH 114 or 116 or 121, which may be taken concurrently, not open to students who have passed GEOL 266Q. Cormier
Evolution of the solar system, celestial mechanics, tidal friction, internal composition of planets, black-body radiation, planetary atmospheres.

PHYS 2XZQ. Fundamentals of Planetary Science
(Also offered as GEOL 276Q.) Second semester. Three credits. Prerequisite: PHYS 123 or 132 or 142, or 152, which may be taken concurrently; MATH 114 or 116 or 121, which may be taken concurrently, not open to students who have passed GEOL 266Q. Cormier
Evolution of the solar system, celestial mechanics, tidal friction, internal composition of planets, black-body radiation, planetary atmospheres.

5. Effective Date (semester, year -- see Note R): Immediately
   (Note that changes will be effective immediately unless a specific date is requested.)

Justification
1. Reasons for adding these courses if they are a new course:
The professor usually teaching these courses, Vernon Cormier, is now a member of the physics department, and hence these courses should be offered through this department. These courses will be offered as electives, and will enrich the variety of topics available in the physics program.
2. Reasons for cross listing this course: With the dissolution of Geology and Geophysics, we wish to insure the continued cross-disciplinary background of the students who have taken these courses in the past, which have typically included a mixture of GEOL, PHYS, and ENGR majors.
3. Other Departments Consulted (see Note N): Integrated Geosciences Program, see attached E-mail
4. Effects on Regional Campuses: None
5. Staffing: Professor Vernon Cormier.
6. Email authorizing the Committee to cross list the courses named above:

Subject: Cross listing GEOL courses in Physics

The Geology and Geophysics Program endorses the cross listing of GEOL 274Q Physics of the Earth's Interior and GEOL 276Q Fundamentals of Planetary Science as
PHYS 2XYQ and 2XZQ. These courses were developed and are taught by Vernon Cormier, Professor of Geophysics, who is now a member of the Physics Department.

2005-25
Proposal to Add a New Undergraduate Course
1. Date: Feb. 1, 2005
2. Department requesting this course: Mathematics
3. Semester and year in which course will be first offered: Fall 2005
Final catalog Listing:
(This is the current course catalog – which will remain in effect)

195Q. Special Topics Lecture
Either semester. Credits, prerequisites, and hours as determined by the Senate Curricula and Courses Committee. May be repeated for credit with a change in topic. (The special topic will be “Introduction to College Algebra and Mathematical Modeling” and will carry 5 credits.)

Items included in catalog Listing:
Obligatory Items
1. Standard abbreviation for Department or Program: Math
2. Course Number (see Note B):
3. Course Title: Special Topics Lecture
4. Semester offered: Fall 2005 only – it is an experimental course.
5. Number of Credits (see Note D): 3 credits
6. Course description (second paragraph of catalog entry -- see Note K):
Either semester. Credits, prerequisites, and hours as determined by the Senate Curricula and Courses Committee. May be repeated for credit with a change in topic.
Optional Items
7. Number of Class Periods, if not standard: 5 credit hours of class meetings per week.
8. Prerequisites, if applicable (see Note F): none
9. Recommended Preparation, if applicable (see Note G): none
10. Consent of Instructor, if applicable (see Note T): No
11. Exclusions, if applicable (see Note H): None
12. Repetition for credit, if applicable (see Note I): May be repeated for credit with a change in topic.
13. Instructor(s) names if they will appear in catalog copy (see Note J):
14. Open to Sophomores (see Note U):
15. Skill Codes "W", "Q", or "C" (see Note T): Q
16. S/U grading (see Note W): No

Justification
1. Reasons for adding this course: (see Note L)
Every year approximately 1000 students enroll in UConn’s five campuses without adequate high school preparation in algebra. This means that a majority of these students either took only one semester algebra (Beginning Algebra) in high school, or, more likely, took the second semester as well (Intermediate Algebra) but did not retain sufficient information from it to be adequately prepared to take college courses which use this material.
Many of these 1000 students will be required by their major to take Q courses for which knowledge of Intermediate Algebra is necessary. Such courses are: all 100 level Q Chem course, Stat 100 or 110, most 100 level physics courses, and most 100 level math courses. Even for a Q course with little algebra requirements, an unprepared student will benefit from the mathematical maturity and knowledge that a review of the Intermediate Algebra material can provide.
At present the Mathematics Department offers Intermediate Algebra material in only one course, Math 101. Math 101 does not provide graduation credits, and covers the absolute minimum algebra skills necessary to survive in Q courses.
There can be no replacement for math 101 for students with very week background, but for many others, who need no more then a thorough review of the math 101 material, the presently proposed course will provide a much better preparation for Q courses. In addition the presently proposed course will offers 3 Q credits upon successful completion, and thus provides a much more attractive venue in which students may not only learn new useful skills but also review the old ones.
I have met and consulted with Cecile Hurley from the Chemistry Department, and the discussions I had with her helped me shape the experimental stage of the proposed course. I also plan to open a dialog in the near future with other departments which offer Q courses in order to fine tune the set of skills the students need in order to succeed in their 100 level Q courses, and incorporate these skills in the proposed course as it moves along from experimental stage to a regular course.
I am maintaining an ongoing dialog with Steve Jarvi regarding ways of identifying and placing students who need to review Intermediate Algebra material into the presently proposed course. There is no doubt that there will be many more students who will opt to enroll in this course then places in the one experimental section.

2. Academic Merit (see Note L):
This course is designed to provide an effective preparation for science courses for students whose high school algebra background is not very strong. It will integrate a review of high school algebra with college algebra and mathematical modeling material, and as such it will teach, and reinforce the algebra and mathematical modeling background and basic skills necessary for success in all beginning 100 level Q courses offered at UConn.

Specifically, Math 195Q will:
• Help students develop and refine basic algebra skills by way of an integrated review of these skills as they are needed in the course.
• Promote problem solving skills in applications involving algebraic concepts through emphasizing the important mathematical notion of a function.
• Enhance the understanding of algebraic concepts through integrated use of scientific and graphing technology.
• Provide a working knowledge of all the elementary math topics used in beginning 100 level Q courses, such as, for example, log and power functions, elementary probability, and matrix manipulations.
• Educate and train students in multi-step problem handling skills, necessary for applications of mathematics to other fields, by incorporating a large math modeling component in the course.

3. Overlapping Courses: This course will overlap Math 101.

4. Number of Students Expected: 32

5. Number and Size of Section: 1 section of 32 students

6. Effects on Other Departments: None

7. Effects on Regional Campuses: None

8. Staffing: Prof. Sarah Glaz will teach the course.

9. Dates approved by:
   - Department Curriculum Committee: January 27, 2005
   - Department Faculty: Dept Head approval: January 28, 2005
