Executive Summary

The Survey of Internet Use and Online Reading was administered to participating seventh grade students (n=61) at School District 04-C during the 2005-2006 academic year.

The results, presented in the following pages in greater detail, include the following findings:

- 92% of students have a computer in their home. Of these students, 96% have Internet access at home.
- 51% say that the amount of time they spend on the Internet has increased during the past year.
- 74% of students report using the Internet the most often at home; 18% report using the Internet the most at school.
- 67% of students are required to use the Internet for a school assignment less than once per week.
- Only 37% of students use the Internet at school a few times per week or more WHILE 80% of students use the Internet outside of school a few times per week or more.
- Only 32% of students use search engines at school a few times per week or more WHILE 48% of students use search engines outside of school a few times per week or more.
- Only 5% of students send email at school a few times per week or more, WHILE 58% of students send email outside of school a few times per week or more.
- Only 7% of students always check the accuracy of the information they read online at school.
- Only 10% of students always check the accuracy of the information they read online outside of school.
